**SAFE DRINKING WATER.**  
FOR EVERYONE.

## **SAFE DRINKING WATER.**

### **FOR EVERYONE.**

India has the 16% of global population but has only 4% of world's water resource. At present, only 18 % of India's rural population has access to treated water. Drinking untreated water could lead to diseases like Cholera, Diarrhoea, Malaria and Typhoid and is the number one reason for infant mortality. In addition to growing water shortage, water pollution and highly inefficient usage pattern aggravate the situation.

In such situations producing drinking water for local communities in developing and remote areas where producing a reliable and affordable drinking water from lakes, rivers and other sources can be extremely challenging. That is why Wilo focuses on developing high-efficiency solutions and technologies that conserve resources. Our development activities consider the entire process from water purification to safe drinking water. Improved water supply and sanitation, better management of water resources, can contribute greatly to poverty reduction and boost countries' economic growth.

## **Simple access to safe water:**

### **Wilo-Safe Water**

***Wilo-Safe Water delivers the futuristic solutions for safe drinking water.***

#### **Features**

- Best in class quality of “Medical Grade Filter Technology” takes out bacteria, viruses, legionella
- Extremely low energy consumption
- Water wastage loss is less than 5%\*
- Integrated self-check system detects air bubbles and stops operating if any leakages
- Fresh and pure safe water with natural taste
- Chlorine/Chemical free safe water
- Easy customization of water treatment technology
- Cost effective solution
- 24x7 available
- No civil work
- Easy Installation and operation

#### **Field of application:**

Everyone has the right to sufficient, continuous, safe, purified, physically accessible, and affordable water for personal and domestic use. No matter where in India, the Wilo-Safe Water Hut and Wilo-Safe Water ATM can be installed at:

## Safe and readily available water

for a better future.

Water Kiosks, where formal water providers supply safe water at affordable price, have proven to be an appropriate and efficient solution, providing water to a large number of residents.

### Optional Features

- Battery\*\*/Inverter\*\*/Solar Operated
- Remote monitoring system
- Accountability option for daily transaction

#### Medical Device & Service Company

Filtration of blood and for patient with end stage renal disease in dialysis clinics

#### Pump & System Manufacturer

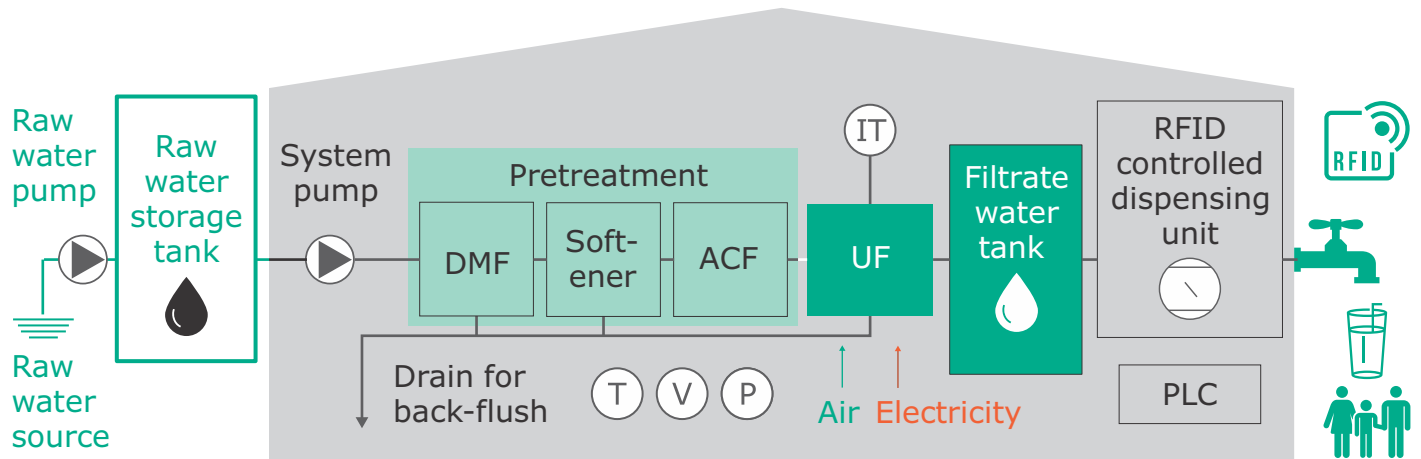

Pump & systems in buildings, water/waste treatment plants and industries

#### Medical Filtration Competence

#### Pump & System Intelligence

PLC Programmable logic controller; DMF Dual media filtration; MF Micro filtration; ACF Activated carbon filtration; UF Ultrafiltration; RFID Radio-frequency identification; IT integrity test; Instrumentation: T Temperature, V Flow, P Pressure

\*Depends on feed water. \*\*For water dispensing unit

### Customer Reaction:

I had to travel for 3-4 Kms to get drinking water before the hut was installed in my village now I save time and get safe water easily to drink for my family

- Ramchander Pawar

Now with safe water frequency of my kids getting sick is reduced and even I am very happy during making food. This keeps my family and village healthy.

- Radhabai Surve
